Agriculture

Ms. Torres: The best thing about being a CTE teacher is bringing the veterinary world to my students they would not otherwise see. I love what I do in the veterinary field and teaching my students all about animal science beyond the textbooks through my clinical experience and through hands-on applications while developing compassion and quality animal care skills is a true delight.

Ms. Bacon: The best thing about being a CTE teacher is introducing students to a world/industry they rely on for survival, but usually have very little experience with.

Slide 2:

Video of fertilized chicken egg lit from beneath.

Audio: This is one of our fertile eggs. This is number 15. And you can see the vein development at the bottom. And there's a dark spot (rotates egg) right here where my finger is (taps egg with finger) and that is the baby chick. As I spin the egg, if you look really close, you can see little pulsations and that is the baby chick moving. This is why I love being a CTE teacher.

Agriculture Animal Science

Ivan Jeronimo-Banda

I have enjoyed the Animal Science Pathway because there is always something new to learn about animals, the farm or even myself. I have enjoyed working with the goats, chickens, lambs, pigs, and even dog on campus. It is something different that many people don't experience. The experience is unique and enjoyable because animal care can be unpredictable and I enjoy helping animals.

My plans after high school will hopefully include Cal Poly Pomona. I am looking forward to a major in Animal Science or Animal Health Science because I wish to work with animals.

Agriculture-Agriscience

Isabela Hernandez

The AG Program has given me new opportunities and showed me new skills. I have had fun learning about new topics and exploring new areas with friends. The whole program is very interesting and an amazing experience to be a part of. It has given me something to look forward to.
