Sports and Health Occupation Education

Slide 1:

Ms. Neely

Twenty-First-Century jobs require 21st Century skills, and CTE teachers help impart those skills to the next generation of workers.

I love that I get to help bridge the gap by providing technical education to students entering the workforce by combining classroom instruction with hands-on learning experiences.

Slide 2:

Maya Rush

I love the Sports Physical Therapy Pathway because I am learning about experiences that I can relate to. Being an athlete, it is important to know how your body works so you would know how to treat it correctly. Being in the Sports Med Pathway has taught me to know the importances of how to treat not only my body, but my peers as well.

My college and career goals is to get a degree in either kinesiology or film and continue my passion for sports by competing at the college level in both Basketball and Track and Field and hopefully go pro.

Slide 3:

George Zhang

The Nursing Pathway has given me such an incredible insight into the human body, healthcare systems, and essential skills that I'll be able to use later on in my career. I'm so grateful to Mr. Fox, Mr.,.Speh, and Mrs. Neely for providing this well-rounded education on human health.

Following high school, I plan to continue my study of health in a Human Biology major, where I'll be able to incorporate what I've learned with new social, cultural, and environmental perspectives on health and wellbeing.
