## SPOOKY SCIENCE

Every year on Halloween, all science classes gathered in the cafeteria for Spooky Science. This is where the science teachers all the science teachers performed many Halloween themed experiments. These all awed the students.

Mr. Izaguirre did an experiment on disappearing cups. He put styrofoam in acetone and it's a physical change because the properties

Ms. Gray did an experiment of glowing flowers. When you put white flowers under a blacklight, they glow!
